

SUMMARY

Mobile App Developer with **2 years of hands-on experience** designing and implementing **production-ready Android applications** and collaborating with cross-functional teams to deliver **clean, scalable, and user-friendly products**. Experienced in **enterprise-grade mobile development**, code maintenance, refactoring, and following **industry best practices** across the development lifecycle.

PROFESSIONAL EXPERIENCE

Software Developer - Elvicto Technologies

Feb '24 - Present

Technopark,Thiruvanthapuram

Software Developer

- Developed **Parkochi**, a user-friendly **Android mobile application** that allows users to book and reserve parking spaces. Handled **application publishing and deployment** for both **Google Play Store** and **iOS App Store** in accordance with deployment standards. Actively maintaining and refactoring the codebase **independently** using **Git version control** to improve stability and adaptability.
- Developed a feature in a **legacy Java Android application** enabling users to **enter payment data offline**, improving reliability in low-connectivity scenarios.
- Integrated **BashiniAI API** into the Parkochi application, contributing to the company securing a **Top 10 position** in the **Ujjain Mahakumbh Hackathon**.
- Built an **end-to-end valet parking system** within one month, including:
 - Android application (Kotlin, MVVM architecture)**
 - Node.js backend** and **MySQL database**
 - On-device **vehicle number detection** and **QR-based verification**
 - Designed to support a **distributed, multi-tier architecture**
 - Developed **unit tests for core Android modules** to validate business logic and ensure **application stability and ongoing code quality**.
- Led a team to develop a **Supervisor Android application** for managing parking spaces using **Flutter Clean Architecture**, focusing on **maintainability, scalability, and long-term adaptability**.
- Developed a **full-stack Android application** for monitoring **IoT devices** in parking spaces using **Kotlin with Jetpack Compose** and **Node.js**. Designed the complete UI using **Figma**, ensuring a responsive and scalable user interface.

INTERNSHIP

AI/ML Engineer intern - Elsys Labs

Jan '24 - Jan '24

Technopark,Thiruvanthapuram

- Developed a **Resume Analyzer** using **NLP** and **FastAPI**, streamlining the candidate selection process and improving recruiter efficiency.
- Implemented **Dockerization** to enhance **deployment consistency, scalability, and maintainability**.

Activities

- **Top 10 Finalist – Carestack CareHack Hackathon**
Developed a **voice-based quiz game** using **speech-to-text conversion (Gemini API)**, focused on accessible entertainment for visually impaired children.
- **Guest Speaker – JS Mavens Tech Meetup**
Delivered a technical session on **Clean Architecture**, covering **separation of concerns**, **repository patterns**, and **scalable application structure**.

Technologies

Kotlin

Flutter

Node JS

React

Clean Architecture

Java

EDUCATION

B.E Aeronautical Engineering	Sep '17 - Jul '22
Hindusthan institute of technology	Coimbatore
• GPA: 8.2/10
